Title: Unprocessed Data from CNDDDB Online Field Survey Form [ds1002]

Geospatial Data Presentation Form: vector digital data

Online Linkage: <https://www.wildlife.ca.gov/Data/BIOS>

Description:

Abstract: In October 2014, the CNDDDB program began accepting data through our Online Field Survey Form, an application allowing users to submit mapped detections directly to CNDDDB to be captured in a digital format. In an effort to encourage increased submission of records through the Online Field Survey Form, we are providing increased access to “unprocessed” submissions for CNDDDB subscribers. These are records that have received minimal review by CNDDDB staff and have not been evaluated for accuracy and incorporation into the full version of the CNDDDB. The data set also includes submissions which have been transcribed by CNDDDB staff into the Online Field Survey Form to allow for digital management of these observations. Mapping of biodiversity data for conservation and resource management, especially for widespread but declining species, presents unique data challenges and can lead to a lag time before data submitted to our program is reviewed and made available through RareFind and our GIS layer. Some rare species may be locally conspicuous and readily observed, leading to numerous observations. In other cases, it may be necessary to distinguish rare observations such as breeding sites from more common observations. The CNDDDB program is currently exploring ways that data from the Online Field Survey Form can help us more efficiently map observations, especially for animal data, as well as provide increased access to data submitted to our program while it is undergoing review.

Purpose: This is a draft dataset providing raw, unprocessed data on observations from the California Natural Diversity Database (CNDDDB) Online Field Survey Form application. These records have received preliminary review by junior staff, but have not been evaluated by senior staff. These raw data are provided to facilitate information flow and evaluation of records submitted through the CNDDDB Online Field Survey Form that have yet to be evaluated for incorporation as element occurrences into the full version of CNDDDB.

Status:

Progress: In work

Maintenance and Update Frequency: Monthly

Point and Vector Object Information:

SDTS Terms Description:

SDTS Point and Vector Object Type: Entity point

Point and Vector Object Count: 0

Entity and Attribute Information:

Detailed Description:

Entity Type:

Entity Type Label: ds1002

Entity Type Definition: Raw, unprocessed records submitted through the CNDDDB Online Field Survey Form application

Entity Type Definition Source: CNDDDB

Attribute:

Attribute Label: OBJECTID

Attribute Definition: Internal feature number.

Attribute Definition Source: ESRI

Attribute Domain Values:

Unrepresentable Domain: Sequential unique whole numbers that are automatically generated.

Attribute:

Attribute Label: Shape

Attribute Definition: Feature geometry.

Attribute Definition Source: ESRI

Attribute Domain Values:

Unrepresentable Domain: Coordinates defining the features.

Attribute:

Attribute Label: Last_Field_Work_Date

Attribute Definition: Last field work date in the format YYYY MM DD. The four digit year is required at a minimum; if the day is provided, then the month is required. Therefore, possible entries are 20150101, 201501XX, or 2015XXXX. If a range of dates, CNDDDB requests the latest date of detection.

Attribute Definition Source: CNDDDB

Attribute:

Attribute Label: Scientific_Name

Attribute Definition: The scientific (Latin) name of a plant or animal recognized and tracked by the California Natural Diversity Database at the time of data submission.

Attribute Definition Source: CNDDDB

Attribute:

Attribute Label: Common_Name

Attribute Definition: The accepted common name of a plant or animal recognized and tracked by the California Natural Diversity Database at the time of data submission.

Attribute Definition Source: CNDDDB

Attribute:

Attribute Label: Element_Code

Attribute Definition: A ten-character (ten-byte) code assigned to each element (species) by NatureServe (formerly The Nature Conservancy) for data management purposes. These codes are common to all Natural Heritage Programs and Conservation Data Centers both within and outside of the United States and allow efficient inter-jurisdictional communication. Complete coding information is contained in the Natural Heritage Program Operations Manual, NatureServe, Arlington, Virginia. Generally, species and element are interchangeable. Elements of diversity may be a species, subspecies, variety, or rare population. The first two characters are used to differentiate between various taxonomic groups. These groups may be sorted or queried by using % as a wildcard to accept any characters which follow.

Attribute:

Attribute Label: Element_Type

Attribute Definition: Element type, either plant or animal. For mapping purposes plants include lichens.

Attribute Definition Source: CNDDDB

Attribute:

Attribute Label: Total_Number_of_Individuals

Attribute Definition: The total number of individuals detected during the survey. This is a text field and may include discrete numbers (3), ranges of numbers (3-4), or orders of magnitude (hundreds).

Attribute Definition Source: CNDDDB

Attribute:

Attribute Label: Animal_Detection_Method

Attribute Definition: Describes how an animal was detected (seen, heard calling, heard singing, captured, camera trap, etc.) and comes from a look-up table.

Attribute Definition Source: CNDDDB

Attribute Domain Values:

Enumerated Domain:

Enumerated Domain Value: Seen

Enumerated Domain Value Definition: Visual detection and identification

Enumerated Domain Value Definition Source: CNDDDB

Enumerated Domain:

Enumerated Domain Value: Heard singing then seen

Enumerated Domain Value Definition: Heard singing then confirmed with visual detection

Enumerated Domain Value Definition Source: CNDDDB

Enumerated Domain:

Enumerated Domain Value: Heard calling then seen

Enumerated Domain Value Definition: Heard calling then confirmed with visual detection

Enumerated Domain Value Definition Source: CNDDDB

Enumerated Domain:

Enumerated Domain Value: Heard singing

Enumerated Domain Value Definition: Heard singing; typically an indication of a territorial male bird defending a site or advertising for a mate

Enumerated Domain Value Definition Source: CNDDDB

Enumerated Domain:

Enumerated Domain Value: Heard calling

Enumerated Domain Value Definition: Heard calling and the call is identifiable to species

Enumerated Domain Value Definition Source: CNDDDB

Enumerated Domain:

Enumerated Domain Value: Captured/released

Enumerated Domain Value Definition: Individual(s) captured (by hand, trap, etc.) and released back into environment

Enumerated Domain Value Definition Source: CNDDDB

Enumerated Domain:

Enumerated Domain Value: Collected

Enumerated Domain Value Definition: Captured, died/euthanized, and collected/retained

Enumerated Domain Value Definition Source: CNDDDB

Enumerated Domain:

Enumerated Domain Value: Dead on road

Enumerated Domain Value Definition: Carcass at or near a roadway that appears to have been killed by a vehicle collision

Enumerated Domain Value Definition Source: CNDDDB

Enumerated Domain:

Enumerated Domain Value: Dead

Enumerated Domain Value Definition: Found or observed dead

Enumerated Domain Value Definition Source: CNDDDB

Enumerated Domain:

Enumerated Domain Value: Photograph

Enumerated Domain Value Definition: Photographed

Enumerated Domain Value Definition Source: CNDDDB

Enumerated Domain:

Enumerated Domain Value: Photograph (trap)

Enumerated Domain Value Definition: Remote camera trap or photo station, oftentimes baited or lured

Enumerated Domain Value Definition Source: CNDDDB

Enumerated Domain:

Enumerated Domain Value: Track/footprint

Enumerated Domain Value Definition: Natural surface or track plate tracks identified to species

Enumerated Domain Value Definition Source: CNDDDB

Enumerated Domain:

Enumerated Domain Value: Tissue evidence

Enumerated Domain Value Definition: Tissue observed and/or collected and identified to species

Enumerated Domain Value Definition Source: CNDDDB

Enumerated Domain:

Enumerated Domain Value: DNA evidence

Enumerated Domain Value Definition: DNA extracted and identified to species

Enumerated Domain Value Definition Source: CNDDDB

Enumerated Domain:

Enumerated Domain Value: Telemetry

Enumerated Domain Value Definition: Radio or satellite telemetry location records

Enumerated Domain Value Definition Source: CNDDDB

Enumerated Domain:

Enumerated Domain Value: Bioacoustic recording

Enumerated Domain Value Definition: Identified from recording of ultrasonic calls or other audio (e.g. AnaBat, Song Meter, etc.)

Enumerated Domain Value Definition Source: CNDDDB

Enumerated Domain:

Enumerated Domain Value: Video recorded

Enumerated Domain Value Definition: Video recording, such as a video camera on a nest or animal right-of-way

Enumerated Domain Value Definition Source: CNDDDB

Enumerated Domain:

Enumerated Domain Value: Scat evidence

Enumerated Domain Value Definition: Scat observed and/or collected and identified to species

Enumerated Domain Value Definition Source: CNDDDB

Attribute:

Attribute Label: Animal_Behavior

Attribute Definition: Information about what an animal was doing when it was detected.

Attribute Definition Source: CNDDDB

Attribute:

Attribute Label: Site_Use_Description

Attribute Definition: Text description of how the site is/was used by the detected species in a biological or ecological context.

Attribute Definition Source: CNDDDB

Attribute:

Attribute Label: Reproductive_Evidence

Attribute Definition: Text field requesting what evidence of animal reproduction was detected, if any, or information leading the observer to believe that reproduction is occurring, or is likely to occur, at the location.

Attribute Definition Source: CNDDDB

Attribute:

Attribute Label: Percent_Vegetative

Attribute Definition: Proportion of the plant population in a vegetative condition (not sexually reproducing) on the date of the survey.

Attribute Definition Source: CNDDDB

Attribute:

Attribute Label: Percent_Flowering

Attribute Definition: Proportion of the plant population in flower on the date of the survey.

Attribute Definition Source: CNDDDB

Attribute:

Attribute Label: Percent_Fruiting

Attribute Definition: Proportion of the plant population in fruit on the date of the survey.

Attribute Definition Source: CNDDDB

Attribute:

Attribute Label: Source_of_Mapped_Feature

Attribute Definition: User description indicating the source of coordinates or mapped feature (e.g. GPS, Google Earth, topo map, aerial photo, Online Field Survey Form map interface)

Attribute Definition Source: CNDDDB

Attribute:

Attribute Label: Mapped_Feature_Accuracy

Attribute Definition: User evaluation of their confidence that the mapped point feature in the Online Field Survey Form map interface represents the real life location on earth. Values are chosen from a picklist: 5 meters, 10 meters, 20 meters, 100 meters, 500 meters, or 1000 meters.

Attribute Definition Source: CNDDDB

Attribute:

Attribute Label: County_Code

Attribute Definition: Standard 3 letter California county abbreviation.

Attribute Definition Source: CNDDDB

Attribute:

Attribute Label: Quad_Code

Attribute Definition: The quad code refers to the 7.5 minute U.S. Geological Survey (USGS) quadrangle on which the record is mapped. The seven digit quad code is based on a 64-map grid in each one degree of latitude and longitude. The first two numbers indicate latitude; the third through fifth numbers indicate longitude, and the final two numbers are a row-column designation, starting from the lower right hand corner of the grid.

Attribute Definition Source: CNDDDB

Attribute:

Attribute Label: Author

Attribute Definition: The last name and first name initial of the primary observer. In the case of multiple observers this field may include either a second observer or "et al."

Attribute Definition Source: CNDDDB

Attribute:

Attribute Label: Source_Code

Attribute Definition: A ten character descriptive code assigned to any information which may be used to map an element occurrence. A source code includes: the first 3 letters of the contributor's last name, the 2 digit year of the data, one character code for the type of document (online field survey forms are all coded "F"), and an additional four characters added to ensure codes are unique (tie breaker).

Attribute Definition Source: CNDDDB

Attribute:

Attribute Label: Elevation_Feet

Attribute Definition: Elevation in feet. This elevation value is determined by the Online Field Survey Form map interface by comparing the mapped feature to a digital elevation model.
